

e.BRAMA – TRUCK VISIT APPOINTMENT IN QR CODE

Driver, do you want to speed up your entrance to the Baltic Hub terminal?

It's simple – at the first Self-Service kiosk, use **the QR code for TVA**, which is available in your e.Brama!

How does it work?

1. Make Truck Visit Appointment, according to the order
2. Arrive at the time you have Truck Visit Appointment (TVA)
3. Scan the standard driver card or the QR code card at the first self-service kiosk
4. On the kiosk select „Yes, I have TVA in the e.Brama”
5. After logging into the application, select icon „TVA QR”

If you have one active TVA in a given time slot, after selecting this function the appropriate QR code will appear automatically.

6. In case of several active TVA for a given hour, select the one you want to execute at that moment from the list

7. Confirm your selection with the button “Generate a QR code for appointment”
8. Scan generated QR code.
